VINCENT HOANG

Applied AI / FDE / Software Engineer

Los Angeles, CA | vincentyhoang@gmail.com | (323) 369-9033 | github.com/Ricecrackerz | linkedin.com/in/vincentyhoang | ricecrackerz.github.io

SUMMARY

Software engineer with 4 years at Dell Technologies building REST APIs, data pipelines and test automation for enterprise infrastructure. Now building applied-AI tools: tool-using LLM assistants grounded in real data and measured with evals.

EXPERIENCE

Dell Technologies, Infrastructure Solutions Group · *Irvine and Santa Clara, CA* | Sep 2022 – Jul 2026

Software Engineer II (Mar 2025 – Jul 2026), Software Engineer I (Sep 2022 – Mar 2025). Rotation program across AI/Computer Vision & Data Analytics, CloudIQ and PowerProtect Data Manager.

- Built and published a public REST API SDK and docs for PowerProtect Data Manager's storage and asset APIs.
- Built export-asset REST APIs and re-architected the data-filter logic in a backup replication-manager CLI.
- Refactored 10+ automated test suites, cutting false failures in the release pipeline.
- Built backend APIs and data pipelines for PowerEdge device health scoring in CloudIQ, with PACT contract tests.
- Built a Flask/React microservices tool automating switch-config collection; Dell ISG Hackathon 2022 local winner.

NASA Jet Propulsion Laboratory · *Software Engineer Intern · Pasadena, CA* | Jun – Aug 2021, Jan – Jun 2022

- Built a 3D globe web app (D3, Node.js, Python) for 30 years of ocean data, speeding stakeholder analysis by 50%.
- Built a geospatial web app (Node.js, PostgreSQL) for analyzing 10,000+ pollution data points.
- Worked directly with JPL scientists and stakeholders to turn their analysis needs into features in both apps.

PROJECT

Paddle Pal, an AI assistant for choosing a pickleball paddle · *Python, FastAPI, SQLite, Claude API* | *Oct 2026 – Present*

- Built a tool-using LLM assistant that answers only from a measured spec table (500+ paddles) and hand-written knowledge pages, with six tools and the data rules enforced in code.
- Wrote eval sets (47 end-to-end and 31 retrieval questions) scoring tool choice, cited facts and honest "not covered" answers; 37 of 39 correct tool choices on the first full live run.
- Shipped a streaming chat app with accounts, saved chats, per-user daily limits and an admin data upload.

LEADERSHIP

- Scrum Master for a cross-functional engineering team across 13+ sprints.
- Led the Networking Committee of Dell's engineering rotation program across 7 U.S. sites (~80 engineers per cohort).
- Hosted early-career technical workshops at Cal Poly Pomona (sheCodes) and Santa Clara University (NSBE).

SKILLS

Applied AI: LLM tool use and agents, RAG, embeddings and hybrid search, LLM evals, prompt engineering, Claude API, AI coding agents (Claude Code, Devin)

Programming: Python, SQL, JavaScript/TypeScript, Java

Backend and DevOps: REST APIs, FastAPI, Flask, Node.js, microservices, PostgreSQL, SQLite, Docker, Linux, Git, Jenkins, CI/CD, Ansible, PACT

EDUCATION

B.S. Computer Science, Cal Poly Pomona · *GPA 3.67 · 6x Dean's List, 2x President's List* | May 2022
